- Styles, Format, Help (?)

Some vehicles have disc brakes on the front and [drum brakes](#) on the rear. A thorough brake inspection will uncover any maintenance or repair issues that need to be addressed to keep you stopping safely. If you are hearing unusual sounds when you brake or if your pedal is too hard to push or has a mushy feel, bring it in for a brake inspection right away. At [{{ Shop }}](#) in [{{ City }}](#) we install **quality NAPA replacement parts**. Give us a call at [{{ Phone }}](#) and let us help keep you safely and economically on the road.
